

Amnio-Ring™

Dehydrated Amniotic Membrane Ring for Advance Corneal Healing

Patent Application: 202541034071

- **What it is Amnio-Ring:** is a specially processed amniotic membrane that's placed over the eye to help heal and restore it. The amniotic membrane comes from the placenta and contains proteins and growth factors that help with tissue repair.
- **What it's used for** Amnio-Ring is used to treat a variety of eye conditions, including:
 - Dry eye
 - Keratitis
 - Corneal scars
 - Chemical burns
 - Corneal defects
 - Partial limbal stem cell deficiency
- **How it works**
Amnio-Ring's natural anti-inflammatory and anti-scarring properties help to reduce inflammation and promote healing.

Side effects :

Some patients may experience a foreign body sensation, but it's not painful. Your vision may be somewhat cloudy during treatment.

Gamma Radiation Sterilisation

- **Superior Microbial Elimination:** Ensures complete eradication of bacteria, viruses, and fungi.
- **Preserved Bioactivity:** Optimized radiation dosing helps retain essential **growth factors** and **regenerative properties**.
- **Extended Shelf Stability:** Enhances product longevity by preventing microbial contamination during storage.
- **Validated Sterility Assurance:** Meets stringent regulatory standards for medical applications, ensuring **clinical safety**.
